Plotting HOBO data

This plot looks at yearly average chamber temperatures during the day for the growing season (I defined this as April-August from 7 AM - 7 PM, but this could easily be changed)

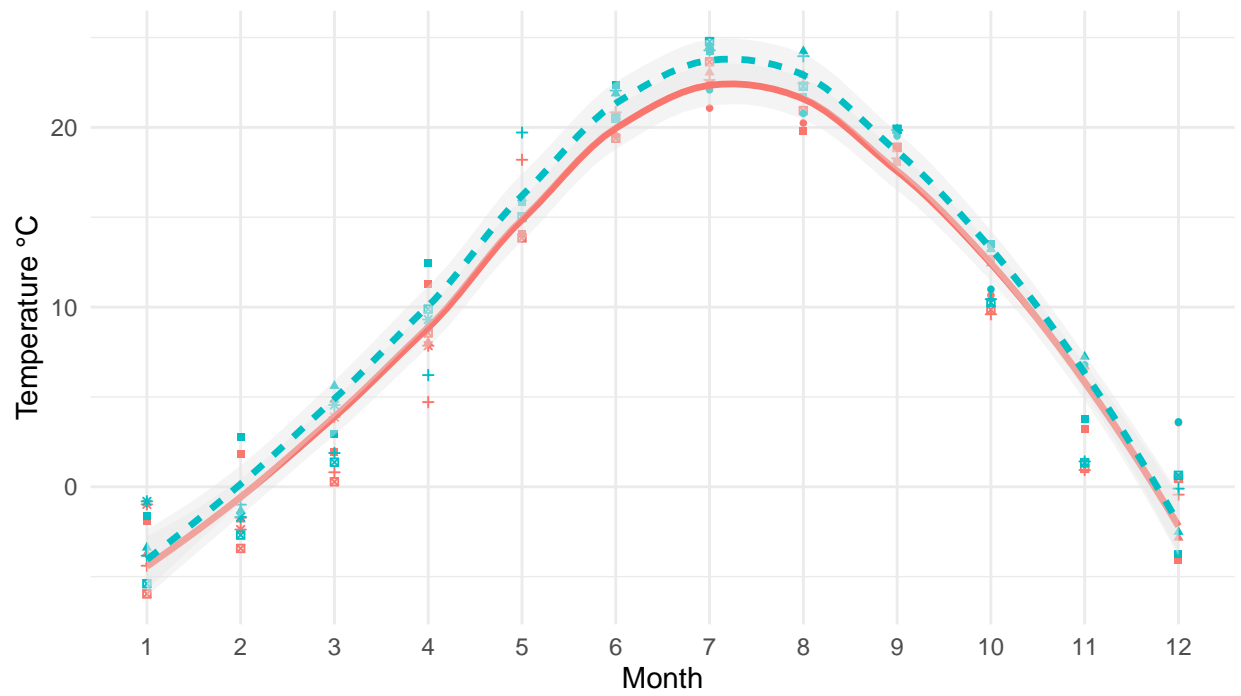

These plots average the chamber temperatures for each month over all years for each treatment

1H sensor

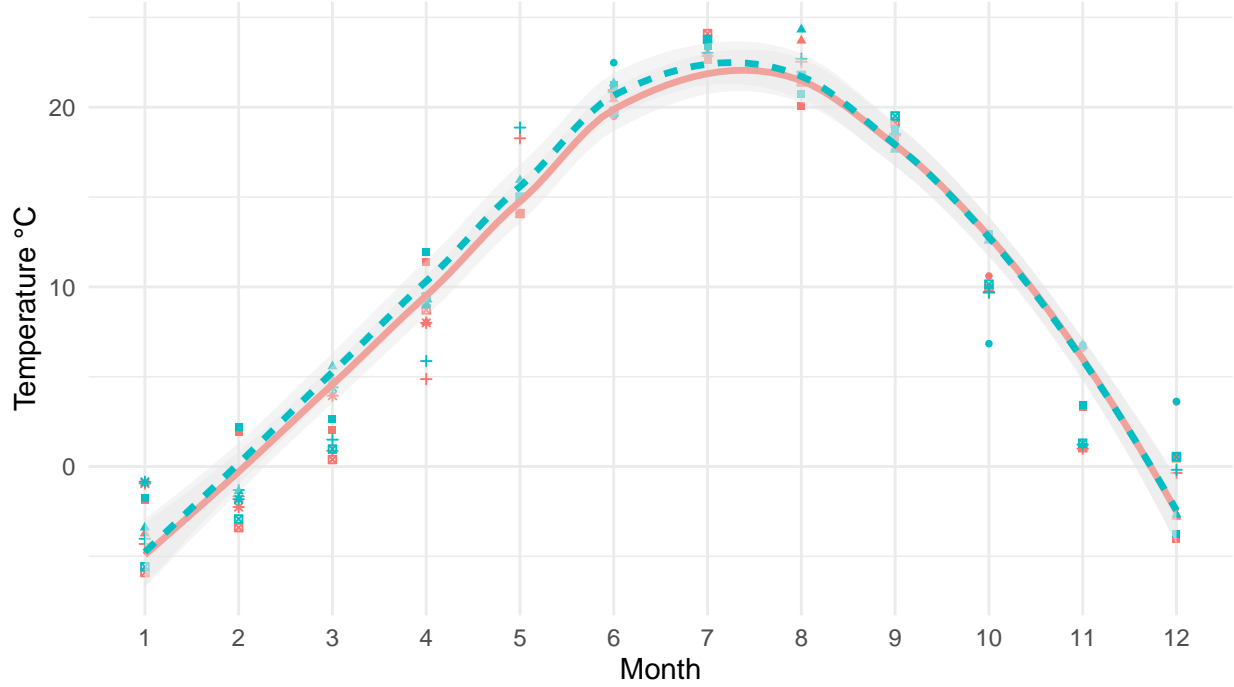

2H sensor

year • 15 ■ 17 ▣ 19 treatment — XH_ambient_air_1m - - XH_warmed_air_1m
 ▲ 16 + 18 * 20

3H sensor

year • 15 ■ 17 ■ 19 treatment — XH_ambient_air_1m - - XH_warmed_air_1m
 ▲ 16 + 18 * 20
