## Plotting HOBO data

This plot looks at yearly average chamber temperatures during the day for the growing season (I defined this as April-August from 7 AM - 7 PM, but this could easily be changed)

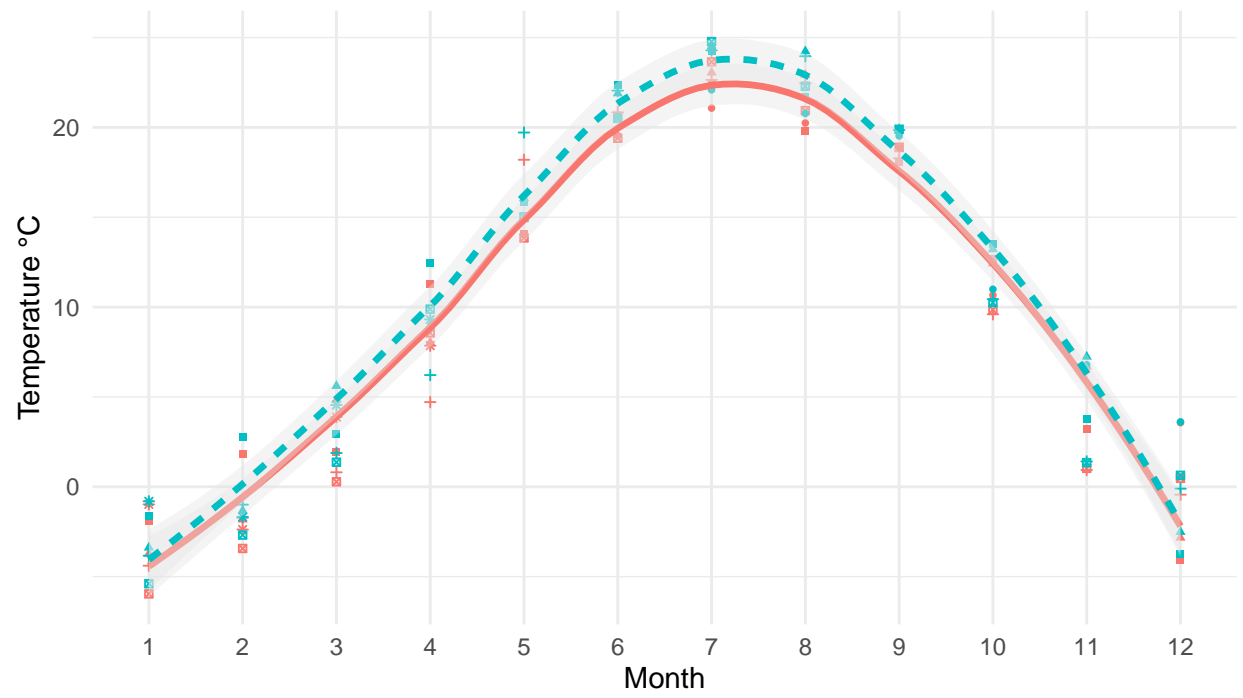

These plots average the chamber temperatures for each month over all years for each treatment

1H sensor

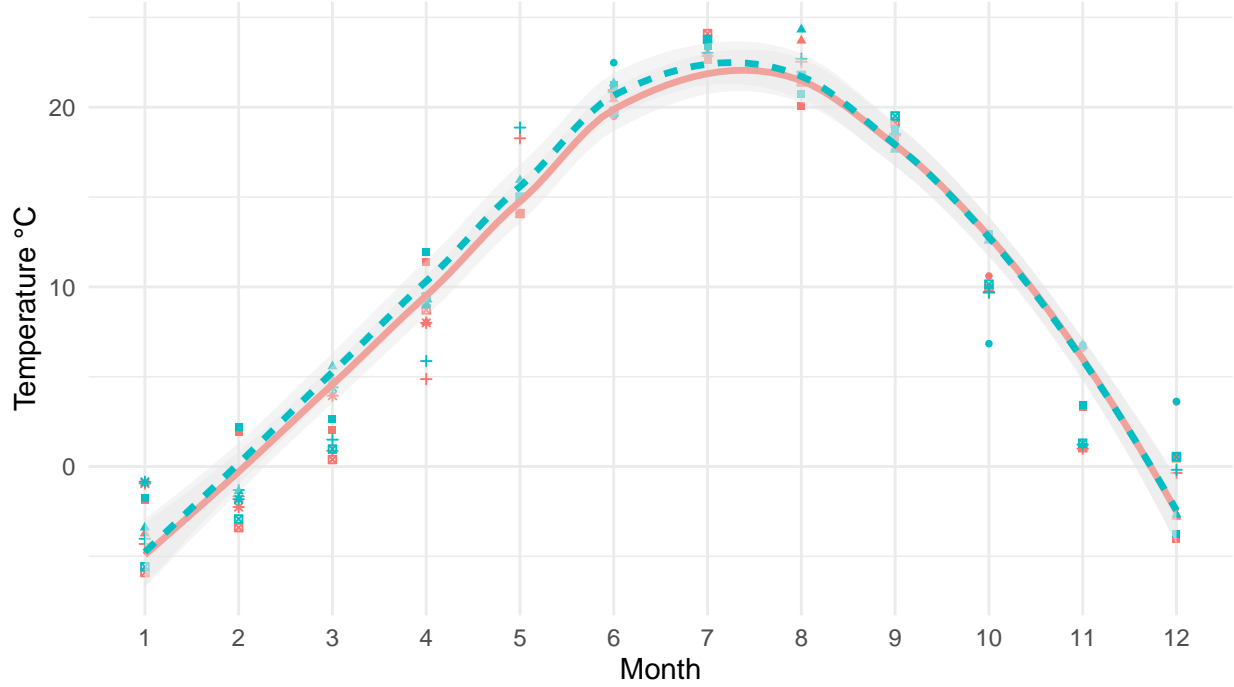

## 2H sensor

year    • 15    ■ 17    ▣ 19    treatment    — XH\_ambient\_air\_1m    - - XH\_warmed\_air\_1m  
          ▲ 16    + 18    \* 20

3H sensor

year      • 15    ■ 17    ■ 19    treatment    — XH\_ambient\_air\_1m    - - XH\_warmed\_air\_1m  
          ▲ 16    + 18    \* 20
