warmXtrophic: HOBO analyses

Kara Dobson

May 31, 2022

COLLABORATORS: Phoebe Zarnetske, Nina Lany, Kathryn Schmidt, Mark Hammond, Pat Bills, Kileigh Welshofer, Moriah Young

DATA INPUT: CSV files are located in the HOBO_data folder in the shared Google drive

DATA OUTPUT: Computes different averages + error for hobo variables measured at each site

```r
# clear all existing data
rm(list=ls())

# load in packages and set working directory
library(tidyverse)
library(plotrix)
library(ggpubr)
library(rstatix)

# Set working directory
L1_dir<-Sys.getenv("L1DIR")

# load in the data
KBS <- read.csv(file.path(L1_dir,"HOBO_data/HOBO_paired_sensor_data/KBS/KBS_pairedsensors_dataremoved_L1
